

WINDOW FILM IN YOUR COMMUNITY

YOU CAN'T SEE IT IN MOST CASES, BUT IT'S THERE, WORKING 24 HOURS A DAY, HELPING PEOPLE IN YOUR COMMUNITY LIVE BETTER LIVES IN MANY WAYS.

HOSPITAL:

Patients and medical equipment are better protected with **safety window film** designed to hold broken glass together during a natural or man-made disaster

MEDICAL RESEARCH FACILITY:

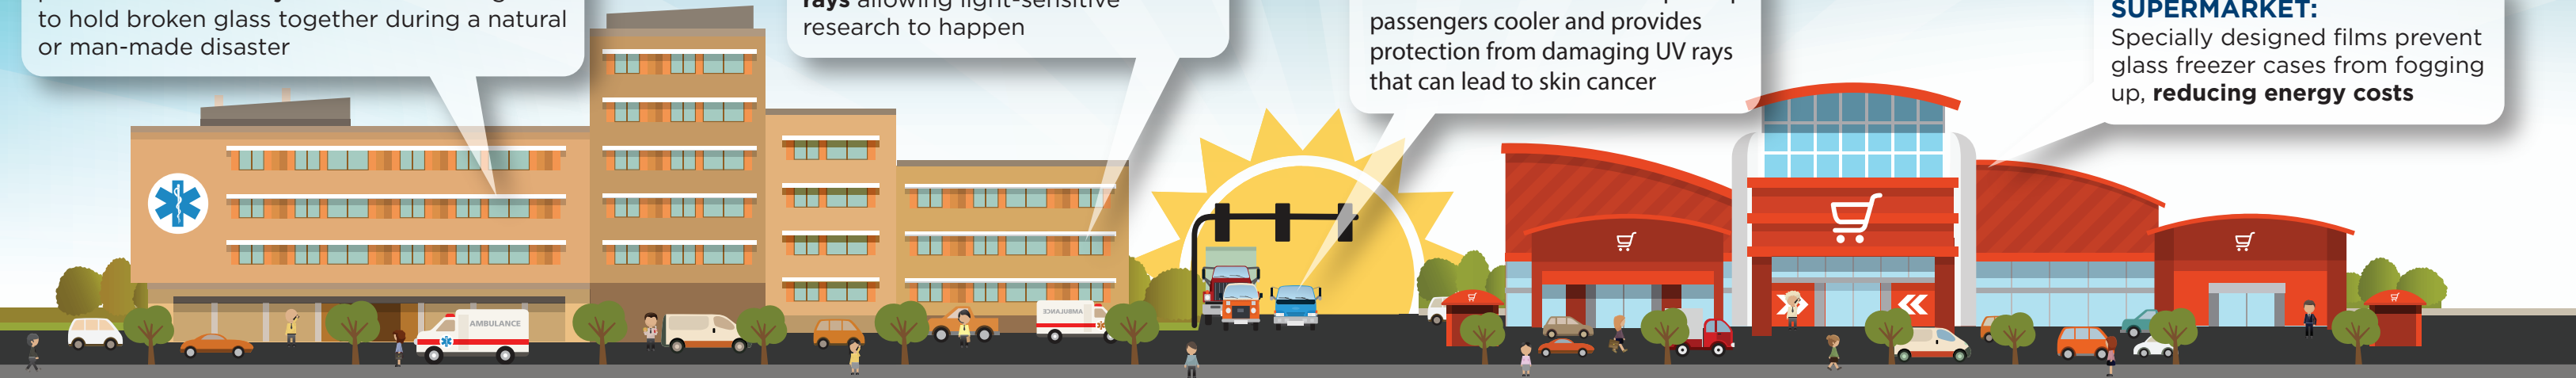

Specially designed films **block UV rays** allowing light-sensitive research to happen

A CAR SITTING IN TRAFFIC:

Automotive solar film helps keep passengers cooler and provides protection from damaging UV rays that can lead to skin cancer

SUPERMARKET:

Specially designed films prevent glass freezer cases from fogging up, **reducing energy costs**

HOME:

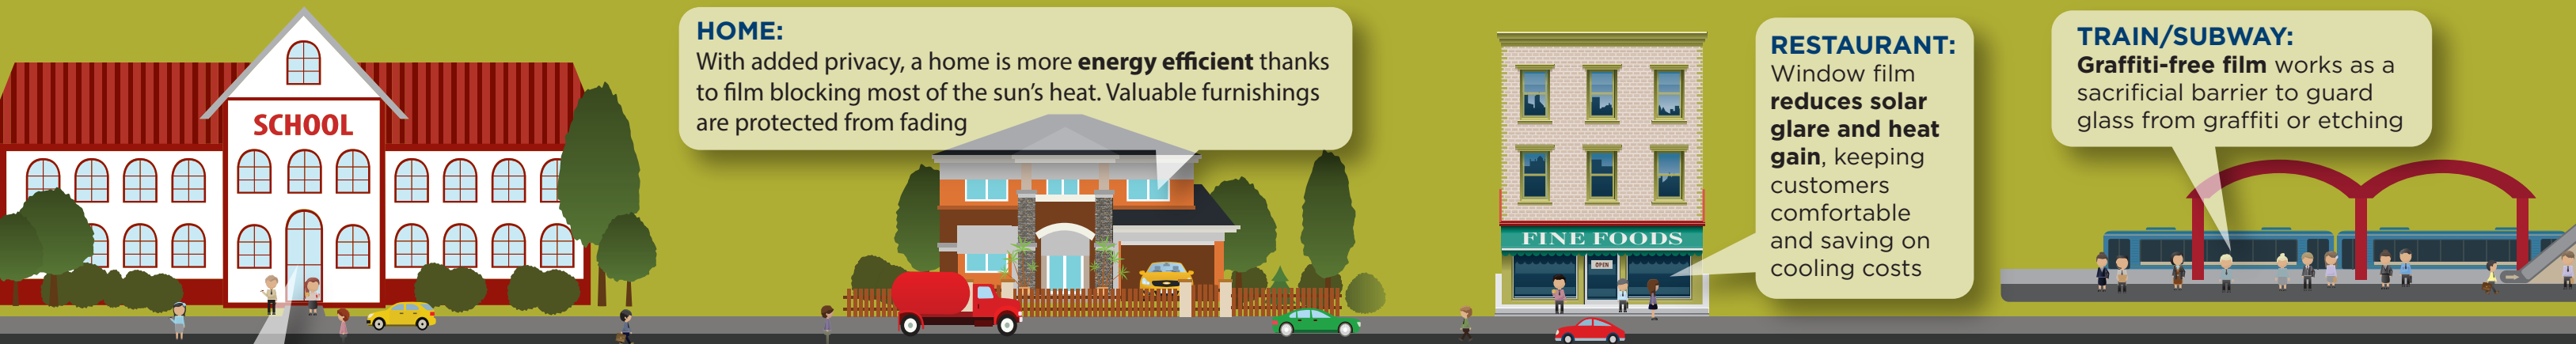

With added privacy, a home is more **energy efficient** thanks to film blocking most of the sun's heat. Valuable furnishings are protected from fading

RESTAURANT:

Window film **reduces solar glare and heat gain**, keeping customers comfortable and saving on cooling costs

TRAIN/SUBWAY:

Graffiti-free film works as a sacrificial barrier to guard glass from graffiti or etching

SCHOOL:

Solar Safety Film makes it difficult for an intruder to see inside and it is designed to help prevent glass from shattering in the event it is broken; making it difficult for an intruder to enter the school through glass windows or doors

OFFICE BUILDING:

Employees are more productive and comfortable thanks to **reduced solar glare** and heat gain. Window film also protects them from cancer-causing UV exposure

MADICO®

WINDOW FILM

can block up to **99%** of ultraviolet rays

and up to **86%** of the sun's heat

WINDOWS ACCOUNT

for **15% - 30%** of the total **heating load**
