

# decolite™

*designer films*

*By Madico*

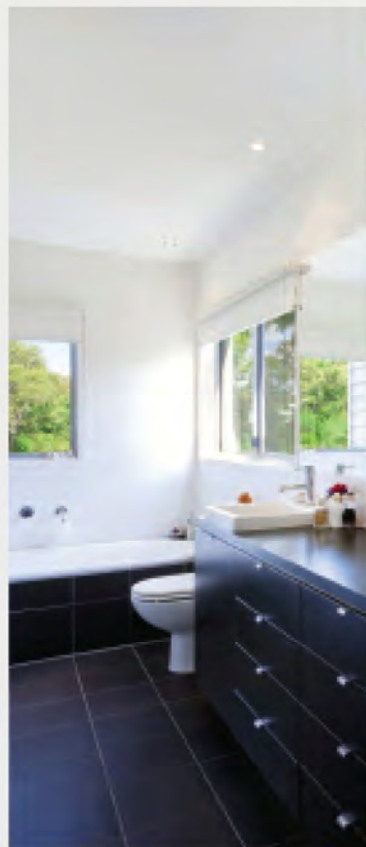

**Decolite™ Designer Films enhance windows and other glass fixtures to create the ideal environment for your interior space.**

## Recommended Usage

Decolite Designer Films are designed for indoor use only. Not recommended for extremely humid environments like saunas and swimming pools. Although variation is minor, we recommend using film from the same lot number per area or room.

## Maintenance and Cleaning After Installation

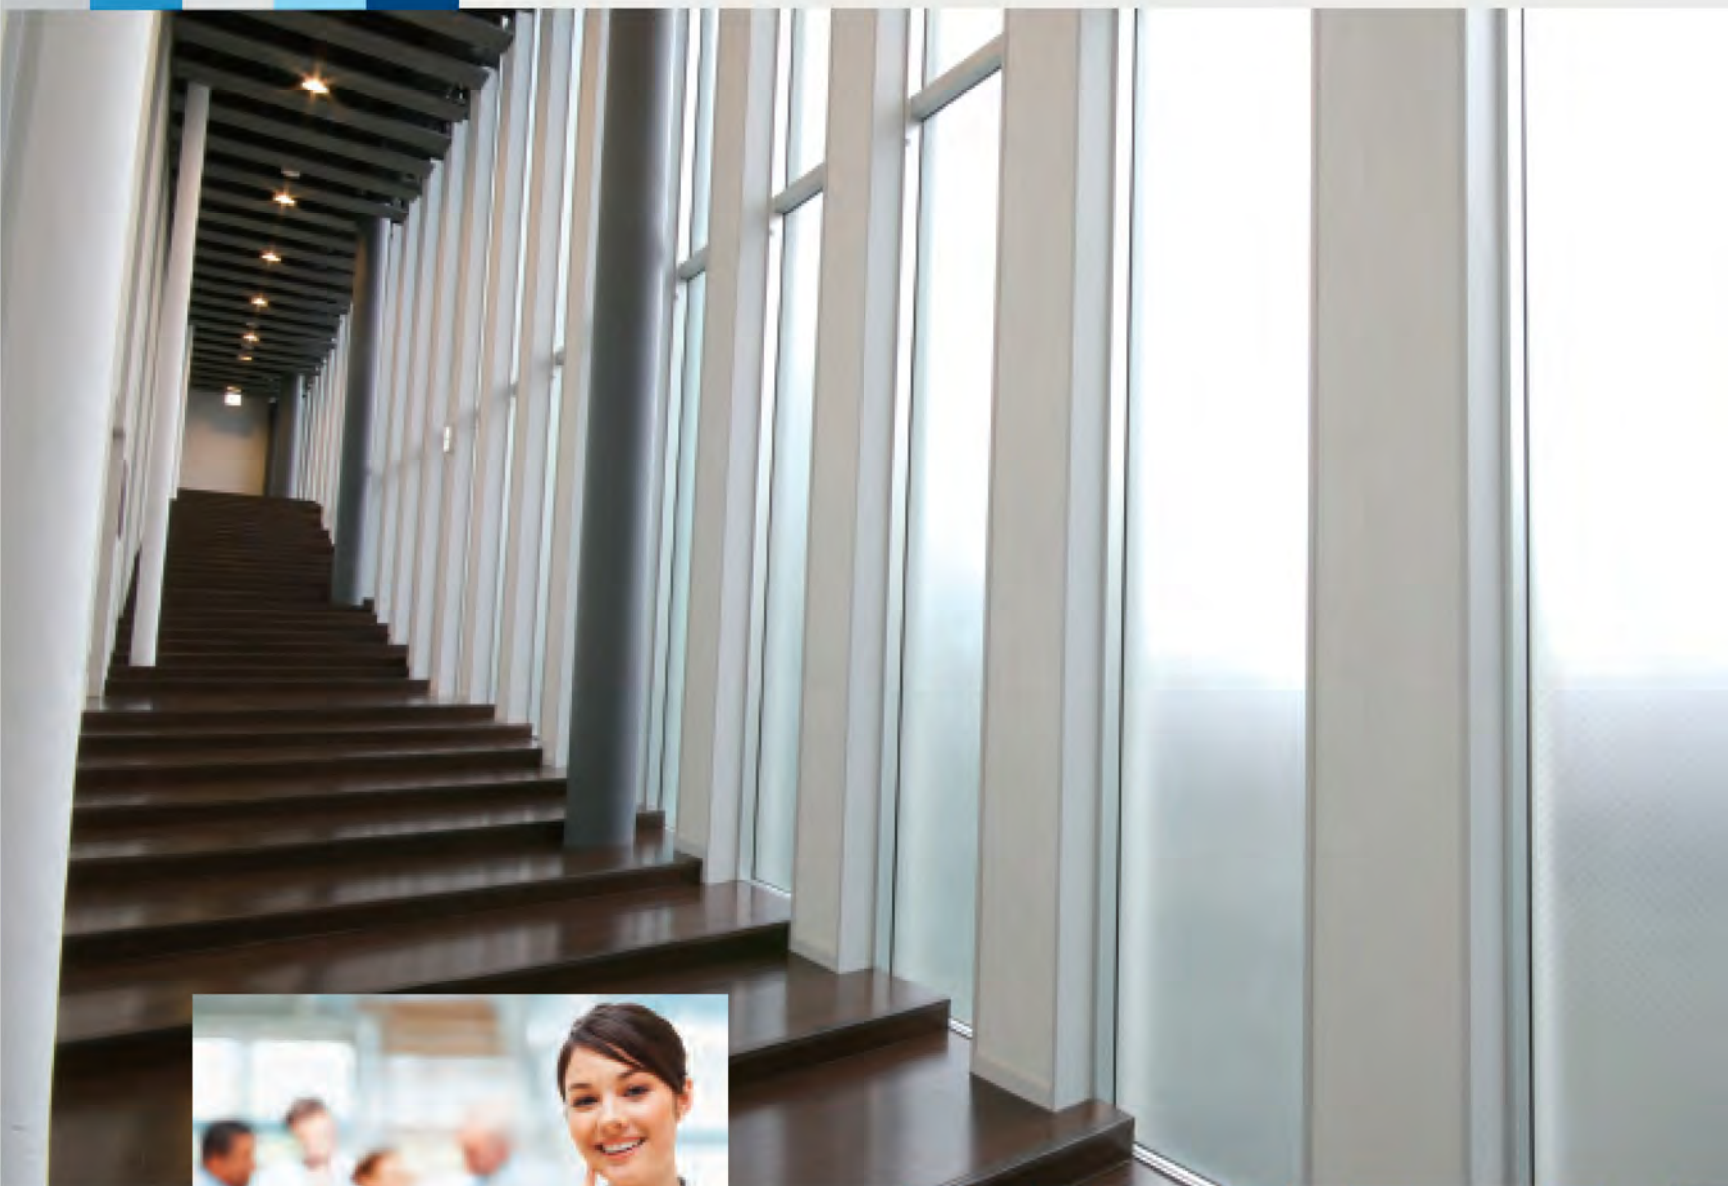

- For everyday cleaning, use a soft cloth and rinse with water. In case of extreme soiling, wash with mild detergent and rinse with water.
- Do not use ammonia, chlorine, or other harsh detergents.
- Do not use abrasive paper towels, cloths or sponges as they may damage the film surface.
- When cleaning near the seam of the film, please wipe in the direction of the seam.

Madico's Decolite™ designer films elegantly enhance the look of glass. These decorative window films allow you to easily retrofit existing glass with an array of classic patterns to compliment any décor. With Decolite film you can achieve the distinctive look of etched glass at a fraction of the cost.

## Discover the **dynamic** possibilities...

A truly customizable product, the films can be cut into a one of a kind design for your unique setting. With a stylish look, you can create private, interior glass spaces while still welcoming in light. The ease of installation and affordability of Decolite products make them the obvious choice when customizing your interior glass. We offer a wide array of patterns appropriate for each individual environment from commercial to residential.

...designed to make a **lasting** impression.

### Decolite Designer Films:

- **Add privacy.** Perfect for office partitions, conference rooms, entrances, and staircases, create privacy using elegant designs. Common residential applications include front doors and bathrooms.
- **Enhance design.** Add style and compliment furnishings, wall treatments, and the overall aesthetics of your environment.
- **Increase safety.** Film helps hold glass together to lessen the likelihood of flying shards during natural and man-made disasters. Visibility of sliding glass doors is also improved.
- **Reject ultraviolet radiation.** Block up to 98% of damaging ultraviolet rays, thereby decreasing interior fading.
- **Cut glare.** Soften harsh sunlight and make work and living environments more comfortable.
- **Protect your glass.** Film acts as a scratch-resistant barrier for the glass it enhances.

*elegant effects*

Our Decolite designer film line offers a complete portfolio of inspired patterns to match your preferences and applications. As styles change, Decolite changes with them at a significantly lower cost than replacing etched glass.

Decolite is applied by authorized technicians and backed by a manufacturer's warranty. Your local Madico dealer is available to provide you with details and an installation estimate.
