

Glass and Frame Toughening Systems Installed by Factory-Certified Professionals

Madico SafetyShield Premier Partners are a global network of factory-trained and certified, consulting dealers who specify, contract and install customized safety & security glazing film and frame toughening systems worldwide. Premier Partners can identify the best system for your building as well as provide peace of mind that your building's windows will help protect occupants and property from explosions, acts of terrorism, vandalism, intrusion, high winds and industrial accidents.

Madico Premier Partners Offer:

- Multiple combinations of glass and frame strengthening upgrades engineered to protect people and property
- Many years of experience in government, institutional and industrial security glazing systems
- Dedicated technical, sales and support staff in addition to local contractors ready to assist with site surveys and risk assessment
- Comprehensive support for the design and specification of window film, window film anchoring, battening, and frame attachments
- Performance conditions achieved under EN, ISO, and ASTM test and certification methods
- Security glazing film in thicknesses from 7 mil (175 microns) to 15 mil (375 microns)
- Also available with energy-efficient coatings for HVAC cost savings as well as glare reduction

Madico is a recognized leader in the window film industry since 1948. Madico is a founding member of the International Window Film Association (IWFA) and an active council member in the European Window Film Association (EWFA).
