DESIGNER  
WINDOW FILMS

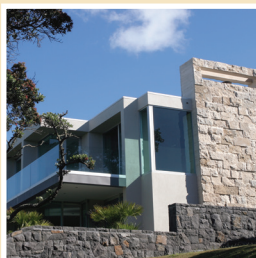

# Sunscape sheds light on protecting your home, health, and indoor comfort.

Choose purity of natural light, without its damaging effects.

With each new day, sunlight streams into your home bringing your interior space alive with warmth, comfort, and beauty. Yet while you do want to embrace its positive effects on your environment, bright sunshine can come at a cost – faded furnishings, artwork, and even flooring over time.

Sunscape Window Films celebrate everything we love about the sun, while creating a safe, energy-efficient environment that captivates as well as it protects. Your family will enjoy cooler summers and warmer winters, along with the benefits of reduced glare and UV exposure, in a superior window film product that lasts for a lifetime.

Sunscape offers several comforting benefits.

- Dramatically reduces energy costs and increases comfort, rejecting heat in the summer while retaining heat in the winter
- Eliminates more than 99% of harmful UV rays that not only contribute to fading of furniture, artwork, flooring, and draperies, but can pose a health risk to your family and guests
- Natural, non-reflective appearance
- The choice of interior designers worldwide
- Warranted for as long as you own your home
- Reduces annoying glare
- Solar safety window film options provide additional protection in the event a window shatters from an accident or severe weather

Sunscape films are available in many shades and styles to complement your home. Our mission is to create high performing films that not only protect, but enhance the aesthetics of your home's interior and its comforts. With Sunscape, it's time to stop shielding your family behind drapes and blinds, and open your world to unspoiled views of a day you were meant to enjoy.
