

Protect People in Urban Spaces with SafetyShield® by Madico®

Protecting people from the dangers of broken glass in an urban setting is important for public safety. SafetyShield is an impact-resistant laminate that improves the safety of glass by holding shattered glass in place in the event of terrorism, civil unrest, or vandalism.

Security officials focus on protecting governmental buildings and hi-profile commercial properties against acts of violence. As these threats increase and extend into the public domain, we need to think about protecting the public from these potential threats. Together, we can increase the level of safety for everyone.

SafetyShield Protects People in Many Public Areas:

- ✦ Bus shelters & subway stations
- ✦ Glass railings
- ✦ Retail environments
- ✦ Elevators, escalators
- ✦ Skylights
- ✦ Point-of-sale kiosks

SafetyShield Safety and Security Films:

- ✦ Cost-effective solution for existing glass
- ✦ 24/7 passive, invisible protection
- ✦ Available in 7, 8 and 15 mil thicknesses
- ✦ Protects people from flying glass
- ✦ Optional tints and view obscuring films limit visibility from the outside into buildings
- ✦ Delays entry by intruders and increases response time
- ✦ Applied by professional installers in the global SafetyShield network
- ✦ Independently tested to meet or exceed safety glazing and intrusion resistance standards in the U.S. and Europe

Wherever there is glass.... We can improve it.
