

# AUTOMOTIVE WINDOW FILM LIMITED WARRANTY

*(United States and Canada Only)*

## Thank you for choosing Madico automotive window film!

To ensure proper curing of your window film, do not roll down your windows for at least 3 days. It can take 3 weeks or longer for bubbles and moisture to completely dry out of film. Do not attempt to pierce a water bubble during the curing period as this will cause damage to your film that is not covered by the warranty. Contact your dealer with any concerns. *Please see care instructions below.*

### WINDOW FILM CARE

A scratch-resistant coating on the surface of the film helps protect it from damage, however, care should be taken to keep your film in good condition.

- Clean the film using any normal, household, glass-cleaning solution or plain, soapy water.
- Use soft, clean, lint-free towels or sponges to clean and dry the windows.
- Do not use any cleaning solution containing abrasive materials.
- Be careful when using any tools or sharp instruments on or around the windows that could cut, gouge, or scratch the film. Your Madico warranty does not cover mechanical damage.
