

MADICO®

Specialty Solutions

We collaborate, develop, and deliver customized products for unique needs.

As one of the world's leading manufacturers of innovative laminating and coating solutions, Madico offers high performance, multi-layer films for protection, safety and security products your customers need. We partner with original equipment manufacturers (OEMs) to achieve new product objectives.

Madico Offers a Wide Range of Manufacturing Capabilities

Coating & Laminating

Madico has more than 40 years of experience in precision coating, laminating, and converting of films in wide width, roll-to-roll format. Our products are complex, multi-layered, and engineered to our customers' precise specifications – and complete satisfaction.

Metallizing

VDI, a subsidiary of Madico's parent company, Lintec Corp, offers three state-of-the-art metallization processes at its Louisville location – evaporative deposition, sputtered deposition and electron-beam deposition.

Contract Coating

Our experience in coating and laminating gives us the expertise to offer outstanding Toll/Contracting manufacturing services. We achieve it through a commitment to systems, processes and execution to bring our customers' products or prototypes to reality.

Need a customized solution?

Our scientists, engineers, and research and development team have the experience, expertise, and passion to help meet your challenge.

The innovations we provide are best illustrated by the industries we serve.

Aerospace

Madico works directly with independent labs to design products that pass the required tests and ensure passenger safety. Our developments in nanotechnology include improved film and coating solutions for protecting aircraft interiors – resulting in durable, lightweight, and easy to clean film products that can resist flames, chemicals, moisture, or scuffs.

Transportation

Madico transportation films offer a cost-effective solution to protecting transit assets including rail cars, trams, subway cars, buses, and more. From anti-graffiti to anti-spall, which improve weight and protects against glass spall and cracking, our films can improve the protection and energy management of your valuable transit assets.

Healthcare

Using a combination of technology and engineering, Madico will be your technical partner to ensure our products meet the stringent requirements of the healthcare industry. Developed with a unique chemistry, Madico healthcare films and coatings ensure water repellency and self-cleaning properties often required in medical applications for disposable eyewear, medical test strips, medical bracelets and packaging.

Building Materials

Madico offers film solutions that can be customized to meet your building material needs. Improve the weight, performance, and cost of glass, or upgrade the performance of your fire-rated, ceramic, or wire glass applications where safety glazing is required, using Madico's specialty films.

Information Display

Madico offers specialty film products for electronic display OEMs and accessory providers for mobile and fixed displays. This includes a wide range of custom and standard solutions to protect displays against end users' interaction during everyday use. Madico's products offer various feature specifications for scratch resistance, hydrophobicity, anti-reflective and anti-glare properties, and, chemical and cleaning resistance, among others. View control films are also available to enhance privacy when necessary.

Contract Coating

Have a unique need that requires the development of a customized product? Bring us your product or prototype and we'll translate its critical-to-quality requirements into a robust roll-to-roll process that enables you to get to market both quickly and cost effectively.
